NON-FINAL ACTION

Applicant's amendment of 10-05-05 is acknowledged.

Based on the "Decision on Rehearing" of the Interference No. 104,798 (paper #121), and the "Judgment—Rule 640" (paper #117), the previous rejection of 102(e) based on **Harris et. al.** (US'373) and **Dunn et. al.** (US'241) is withdrawn since applicants were deemed to be entitled to benefit of their PCT filing date.

Claims 1-6 are still pending.

Double Patenting

The **nonstatutory double patenting** rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-6 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims of copending Application No. 09/ 623,737.

Art Unit: 1624

Although the conflicting claims are not identical, they are not patentably distinct from each other because the subject matter of the instant claims 1-6 reads substantially (if not identically) on claims of 09/ 623,737 as the instant case is a refiled case of 09/623,737.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

The parent application (09/ 623,737) has been involved in Interference No. 104,798. In PALM, the last entry is "Interference Decision on Priority – Adverse" to application 09/ 623,737. Subsequent papers (provided by applicants) have not been entered in PALM. It is recognized that amended claims 56, 59 and 60 of 09/ 623,737 were awarded to applicants as set forth in "Judgment – Rule 640" (pager #117) filed 10-05-05. However, it is not evident if the instant claims (1-6) correspond to the awarded claims as the Examiner has been unable to obtain the parent file.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tamthom N. Truong whose telephone number is 571-272-0676. The examiner can normally be reached on M-F (9:30-6:00).
